

Discussion – Main Section

1. Organize by Research Questions
 - Student Attitudes toward Laptops
 - Student Behaviour toward Laptops
 - Student Performance & Laptops
2. Go to the results of **EACH question** and write down/highlight the key results you wish to emphasize
 - a) For each result
 - summarize clearly without numbers
 - Go to your literature review and find ALL the relevant research around this results
 - Note whether the result **matches previous research**, **does not match previous research**, or is a new result
 - **If the result matches you are done**
 - If the **result does not match**, then you can offer 2-3 insights as to why this match may not have occurred – be concise – also opportunity for future research if you are speculating
 - **If it is a new result**, you are done
